busy day for the G. A. R. veterans. The first session of the encampment opened at 9:30. Among the reports to the National encampment is that of the special committee on legislation. The object of the appointment of this committee was to secure the enforcement of two federal laws almost totally disregarded for many years: First, providing that those discharged from military or naval service by reason of wounds or sickness should have preference in appointment to public office. The other in regard to recommending ve'erans to business men and firms of the country for lucrative employment.

LONDON, Sept. 6 .- Colliery strikers are again restless today. Reports from Alfreton and Chesterfield say that dis themselves to what they want. A force evy to pay the bonded indebted- of dragoens has been sent to the

Coal is becoming very scarce. The Midland rallway will have to lay off thirty passenger trains after Monday, because of lack of coal.

At Chesterfield, Derbyshire, las evening the disorders were particularly violent and troops from the sixth dragoon of guards and a company of Irish fusiliers had been sent there to help restore peace. When the fusiliers ar rived at Chesterfield they found that a mob of riotous miners had possession of the colliery premises. The rioters were dispersed. The people of the town are in a state of panic over the action of the strikers. The troops will remain to prevent further disorder.

Serious riots occurred last night in Yorkshire. Several colliery buildings were sacked and burned. Troops were called to disperse the rioters and to guard mine property.

A miners' riot also occurred at Thimble, Wales, last evening and troops of cayalry were necessary to suppress it.

LATER.

Six hundred miners marched to the Mexborough Colliery, in Yorkshire, and overpowered a small force of police, They drove off the officials, set fire to machinery and book-. They then marched to the brewery and the brewer saved his property by rolling out many barrels of beer.

HOP MATTERS.

The Oregon weather bureau, in its latest circular says: "The hop crop is demanding the attention of the public, Preparations are being made for picking and securing large yields. From the first propitious weather which predominated resulted in securing to the hop grower an excellent stand. Now the vines are laden with burrs, of good average size and of excellent quality. Picking will commence in some sections on the 7th of September. The warm, dry weather of the past week caused the lice to multiply, especially on bottom lands where the vines are green. The crop is so far advanced towards maturity that there is little fear of any material injury being done round hats. by insects; should the weather be sufficiently warm to assist them in increas-

In looking over the situation, hopgrowers of the best financial ability are puzzled. Under the present extreme stringency in money matters, picking money is very difficult to obtain on ordinary collateral, and it is almost impossible to contract hops to the dealers with a condition to have picking money advanced without getting very much the worst of the bargain.-Exchange.

Picking commenced today on a number of large hop ranches hereabouts. At the Beardsley farm in Polk county over a hundred pickers are camped and begun work this morning. W. H. Holmes, Geo. Bun and others are also a bout to begin.

White pickers will be used almost exclusively hereabouts. In fact the only Chinese engaged are in small bunches, for even the Chinese growers do not like them. Geo. Bun Sing, who has a good crop to pick, says he can not trust them to any great extent, and hires mostly white people. It is to be hoped this year's action will forever banish these alien foreigners from the
